Hi Paul & Jade

The Examination of Items SOP (#17142) is for all other items except for sexual assault items. This SOP was provided to ESR as it is referred to in the other sexual assault examination items. It was provided so that ESR has a more complete context of the sexual assault SOPs. It is very processed focussed, as it describes how to enter testcodes into Auslab and provide electronic results to the QPS – neither of which ESR do.

Cheers
 Cathie

Hi

Just another thought – bottom of page three where it talks about the examination of items.

Does this need to be tightened up?

Is it a problem that the report does not comment on the fact that Ms Reeves is wrong in her thinking?

In terms that "false negative" issue Ms Reeves discusses is not an issue at all.

Hi All,

Please find attached the report from ESR.

You will note that they specify the process as starting from 2010 with notated comments on minor changes

I can also advise that the 1st stage of Project 181 is complete and confirms the current process is fit for purpose and the methodology is scientifically sound. A written report will shortly be provided

Please contact me for any further explanations
Regards
Paul
