**Subject:** followup sperm searching

Hi Jacqui, I had a meeting planned with Kirsten but will be rescheduled for early next week due to her absence today. Regarding the case you brought to me yesterday, I have asked ERT to search the SAIK slides again to check into the initial read.

Al appreciates the issue raised and we will look into how to handle the matter. He had some lengthy absence since I passed it on to ERQ previously and should be in a better position now to investigate further. I will keep you informed of the outcomes – this could include looking into the suspensions and slide prep vs dlys slide prep which will always be more concentrated (as taken from pellet). I am sure there is something that could be improved to mitigate any risks.
