## Report for QIS OQI - 18580 No Title Provided

### OQI Details

<b>Status</b>	Closed Approved
<b>Subject</b>	When moving the slicprep base and spin basket with collar from the centrifuge to the bench of the MPII B platform, the slicprep base dropped from the collar and spin basket on to the MPII B bench and lysis solution splashed onto the bench and possibly into surrounding samples. After the accident, the collar and spin basket was returned to the slicprep base. After consultation with the Analytical PO4, the extraction was continued and all relevant information was entered into batch and sample audit trails in AUSLAB.
<b>Source of OQI</b>	Clinical Incident
<b>Date Identified</b>	10/01/2008

### OQI Creator Contact Details

<b>Creator</b>	Breanna GALLAGHER
<b>Organisational Unit/ s</b>	DNA Analysis
<b>Service/ s</b>	
<b>Site Location/ s</b>	Coopers Plains

### Investigator/ Actioner Contact Details

<b>Actioner</b>	Allan MCNEVIN
<b>Organisational Unit/ s</b>	Analytical
<b>Service/ s</b>	
<b>Site Location/ s</b>	Coopers Plains

### Investigation Details

<b>Investigation Completed</b>	11/01/2008	<b>Root Cause Type</b>	Other	The above description refers to extraction
<b>Investigation Details</b>	batch CWIQEXT20071219_03. This resulted from human error.			
<b>Performed By</b>	Quality Information System			

### Action Details

<b>Action Complete</b>	11/01/2008	<b>Action Fix Type</b>	Other	Specimen notes against
<b>Title</b>	<b>Action Description</b> each sample and batch audit entries were made to disclose error. Samples were placed onto the appropriate team communications lists in AUSLAB. OQI number entered in UR notes for each sample This OQI will be discussed in the Analytical team meeting 14-1-08. The need to handle the SlicPrep device by the base at all times will be highlighted. Case			

managing scientists will assess the usability of each sample, ability to resample / resubmite etc.
