Subject: FSS advice regarding DNA reporting

Good afternoon Bruce

On Monday, 6th of June 2022, the Premier announced a Commission of Inquiry into Forensic DNA Testing in Queensland. The Premier also announced that, moving forward, samples that fall into the category of 'DNA insufficient for further processing samples' would be profiled.

On the 6th of June, the Forensic Register was amended to ensure that all crime scene samples with a quantitation value above 0.001ng/uL are amplified and results provided electronically to the QPS.

I would appreciate if you could circulate this advice to your QPS colleagues.

Thanks and Kind Regards
Lara
